

The overall objective of the e-learning courses development is to provide an open-access on-line resource to share skills and knowledge offered by the face-to-face trainings and seminars carried out by the "Civil Society. Dialogue for Progress" project, making them available to wider audiences and for a longer period of time.

While being generally available to anyone interested, the e-learning courses mainly target junior and middle-level members of CSOs active or interested in being involved in policy dialogue, as well as EU project grantees and potential EU grant applicants in EaP countries.

The following three e-learning courses are developed:
