

# Civil Society: a critical thinking position

---

MIKAYEL HOVHANNISYAN, EURASIA PARTNERSHIP FOUNDATION

# Why disinformation happens?

---

# Everyone can be media

---

Not everyone is responsible, smart or moral

---

# The correlation between the freedom and responsibility has changed

---

# Intensification of information flows: can't absorb, need to filter

---

# How does critical thinking help?

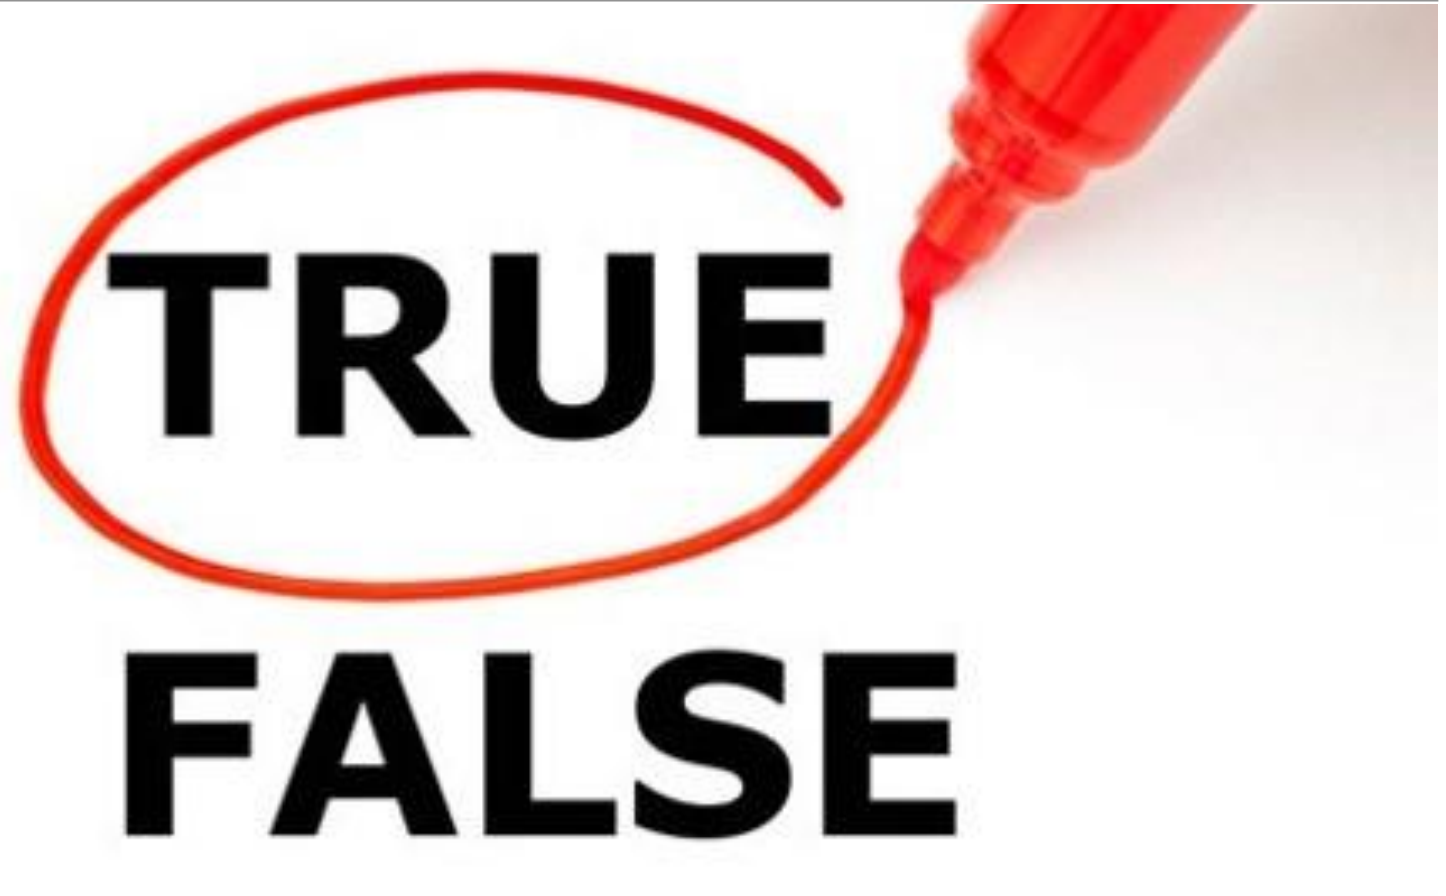

---

Checks and verifies the information

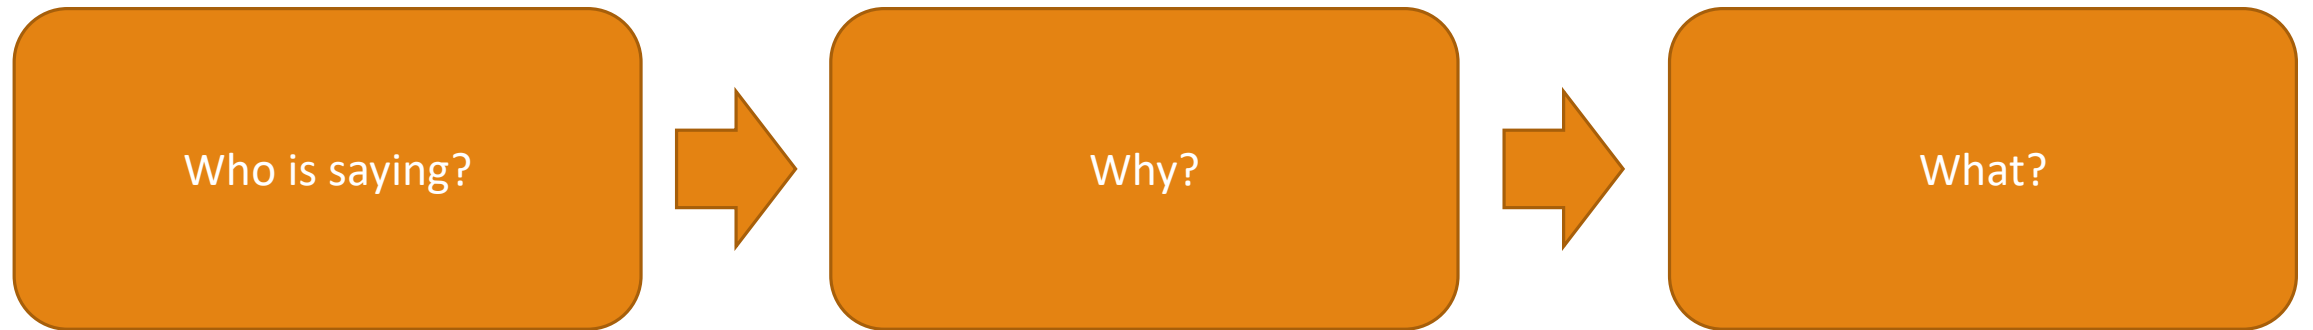

---

# Analyzes the content and the context

---

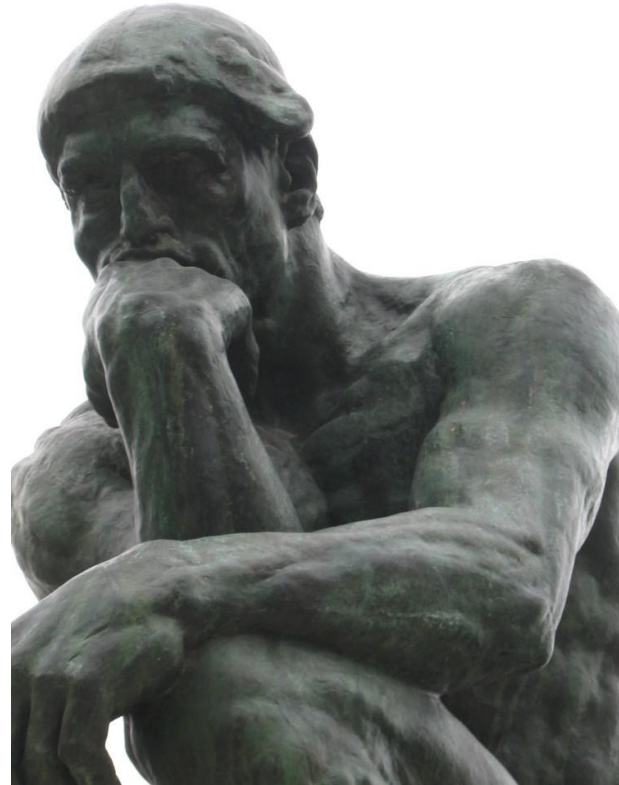

# Does not rely on the dogmatic consensus

---

How Civil Society as a position is allowing to address the disinformation?

---

Monitors, evaluates, watchdogs,  
observes and analyses

---

# Is flexible and reflective enough to learn and experiment

---

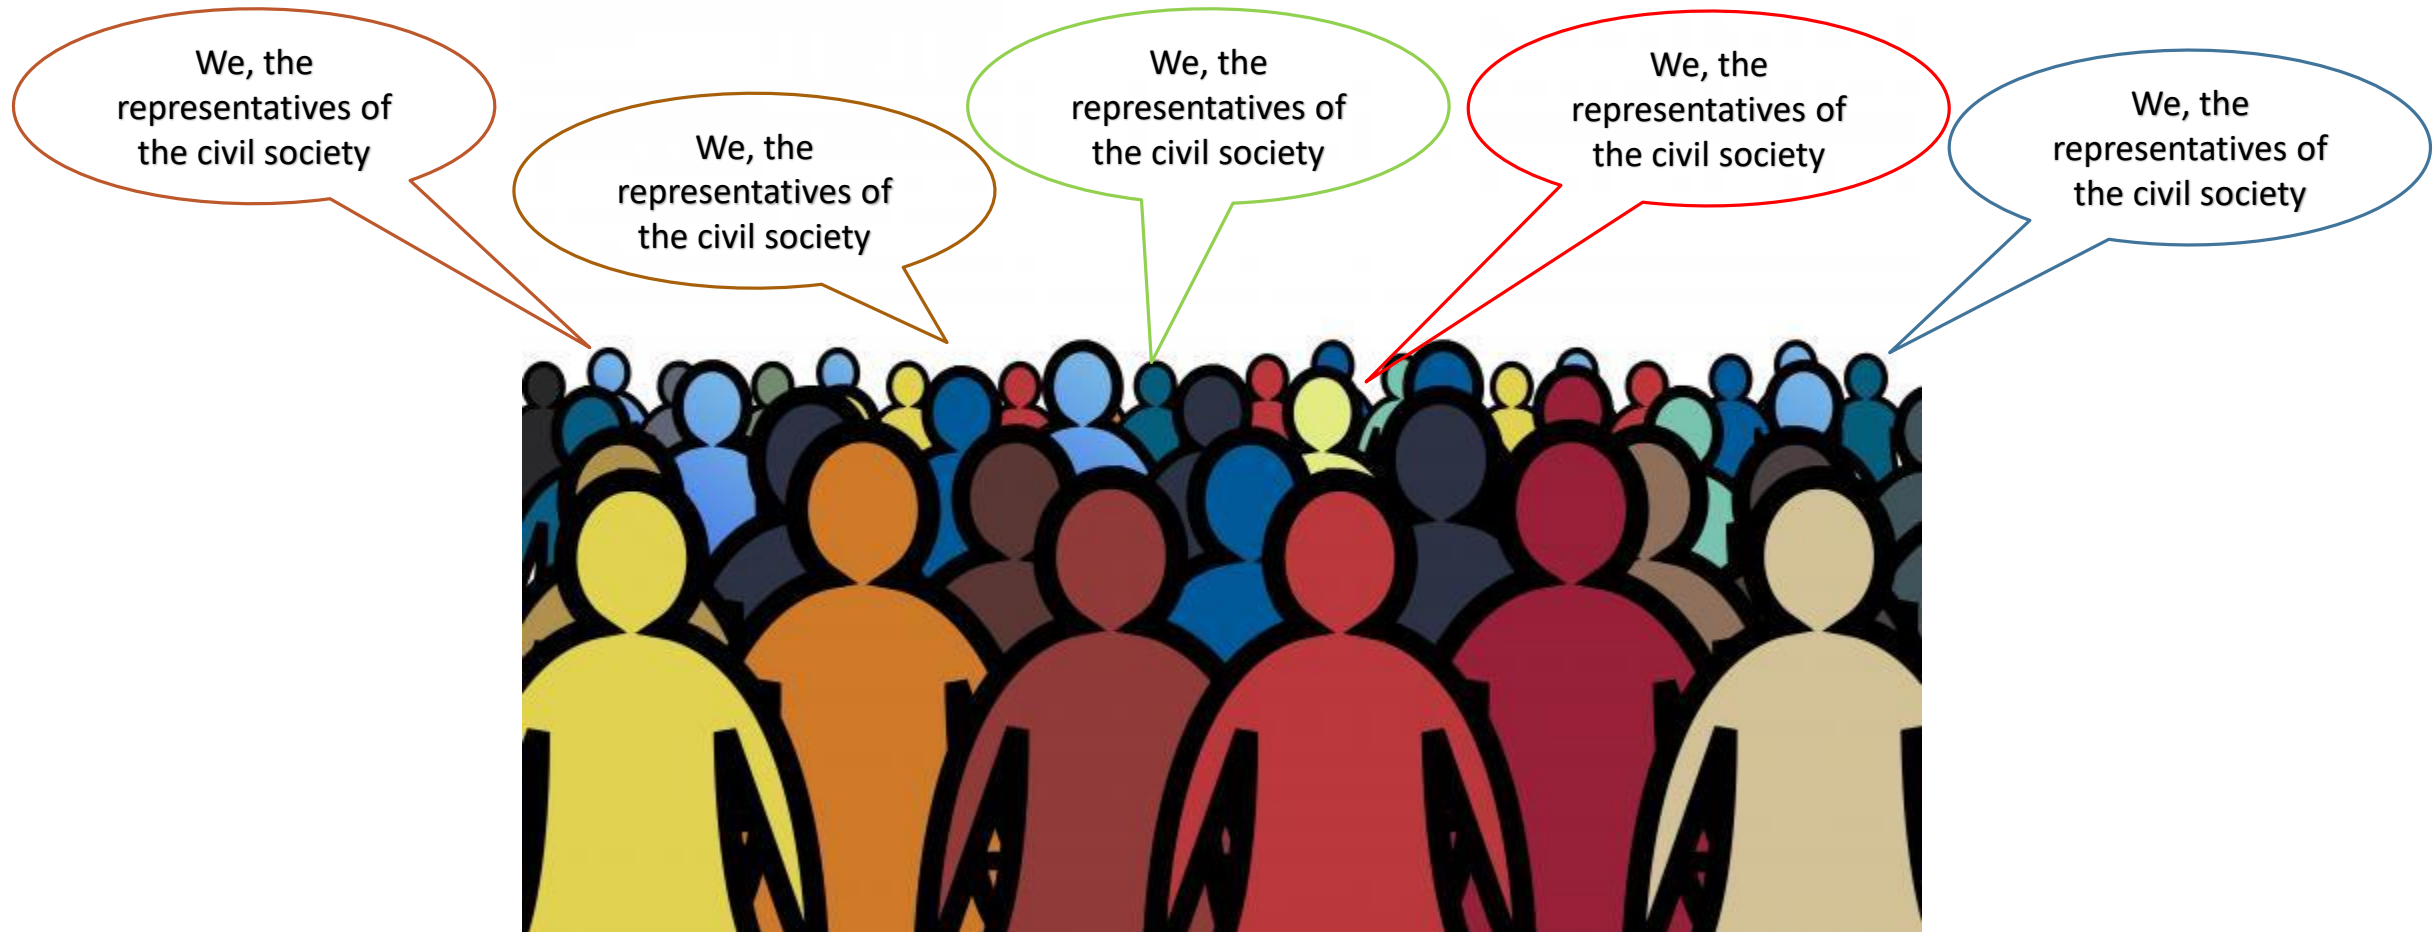

# How civil society is targeted and why?

---

# Due to the multiplicity of identities can be inappropriately generalized

---

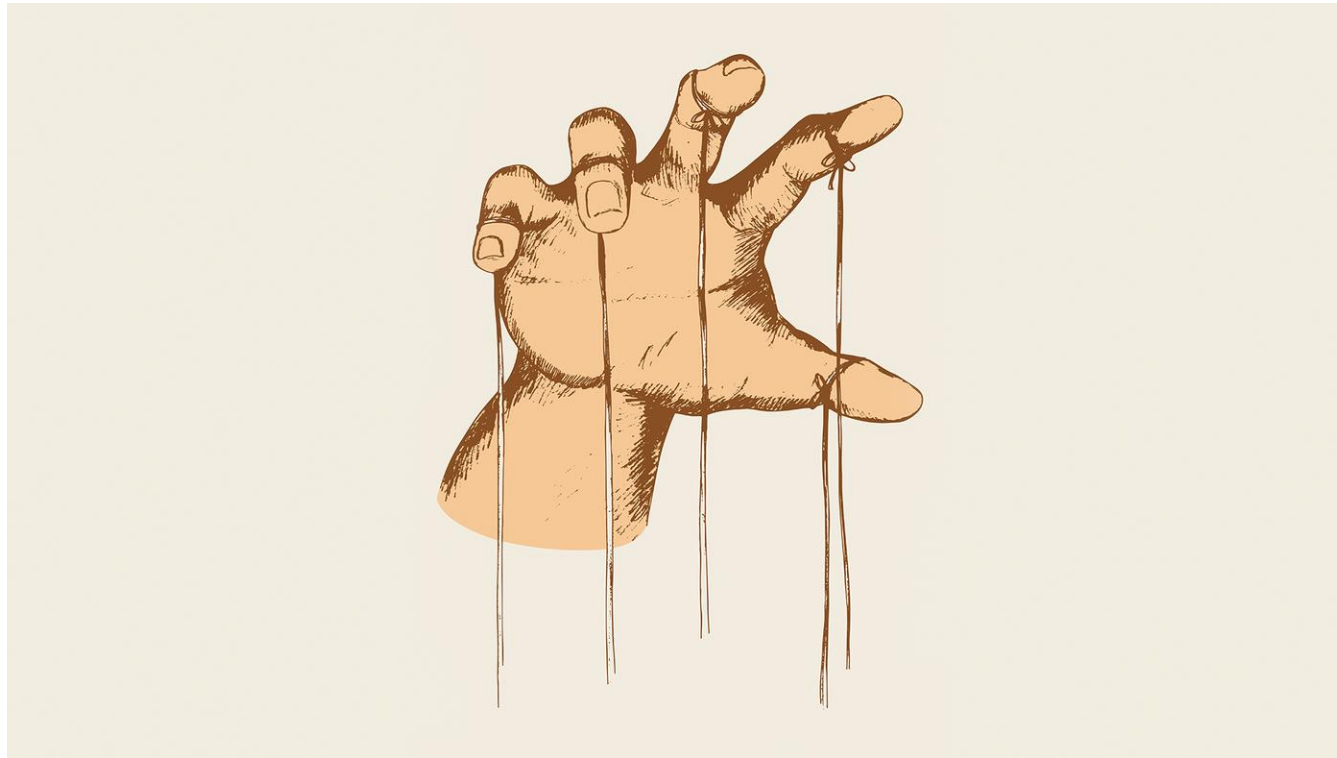

# Has limited resources for communication

---

# Is an easy target for manipulations

---

# Strategy 1- Fact checking and news verification

---

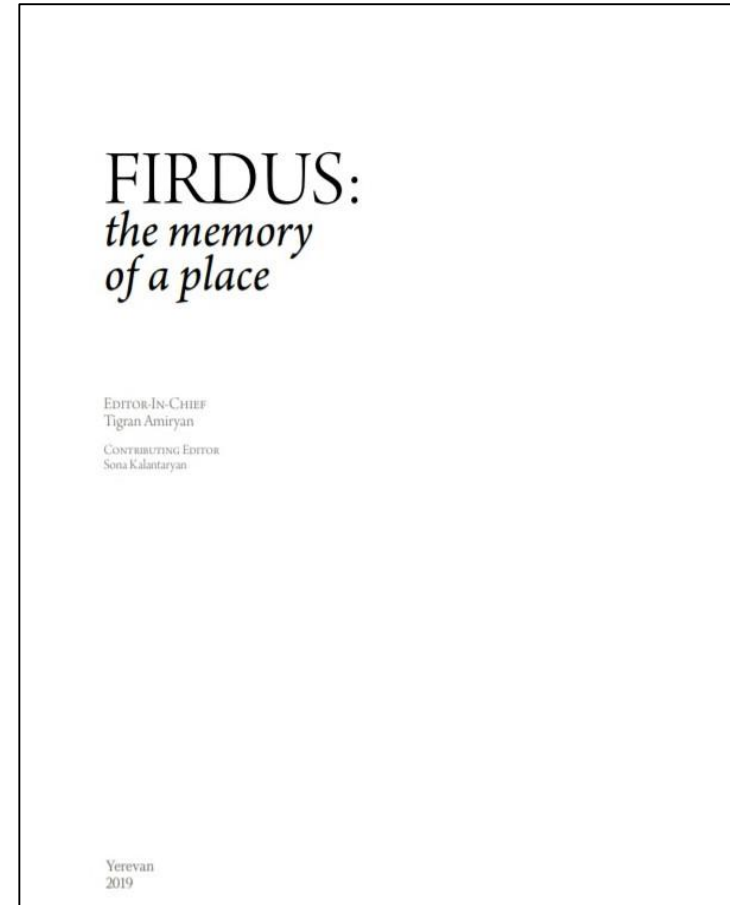

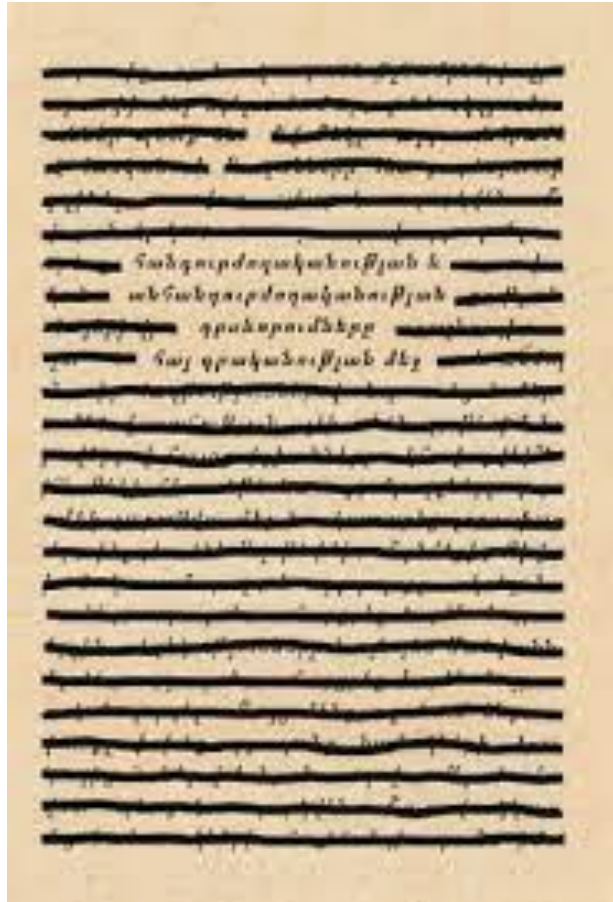

# Strategy 2- Civic Education

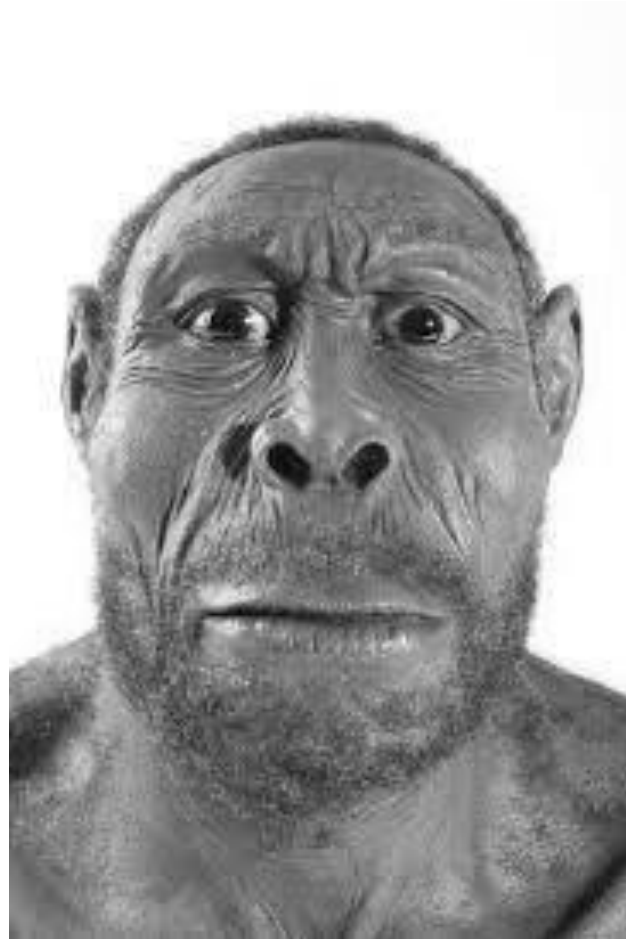

# Strategy 3- Filling the gap with constructive content

Homo Sapiens is only an opportunity...

---

---

Thank you!
